EDUCATION

Bachelor of Engineering *December 2020 - July 2024*
Artificial Intelligence And Data Science **OverallCGPA:7.49**

CAREER OBJECTIVE

B.E. graduate in Artificial Intelligence and Data Science with hands-on experience in **Python, SQL, REST APIs, AWS Cloud, data processing, Docker, and CI/CD**. Built projects involving Flask API development, JSON-based data exchange, AWS data pipelines, cloud infrastructure, and application deployment.

TECHNICALSTRENGTHS

Programming & Data: Python, SQL

Devops: Linux, GitHub Actions, Docker, Git, Terraform

Cloud: AWS S3, EC2, Lambda, Glue, Athena, RDS, CloudWatch

Tools: Git, Streamlit, Postman

PROJECTS

AWS Data Engineering Pipeline for Premier League Analytics
Technologies: Docker, Terraform, AWS ECS Fargate, ECR, RDS, GitHub Actions, CloudWatch

- Developed an end-to-end ETL pipeline using Python to extract, clean, and transform Premier League statistics from multiple public websites.
- Built a cloud-based data lake on Amazon S3 by storing processed datasets in Parquet format and loaded acurated data into Amazon RDS PostgreSQL.
- Configured AWS Glue Crawlers and Amazon Athena to enable automated schema discovery and serverless SQL analytics on S3 data
- Used Amazon Athena to run serverless SQL queries on data stored in Amazon S3.

Notes App— DevOps Project on AWS

- Containerized a 3-tier web application (Python Flask + PostgreSQL + Nginx) using Docker and Docker
- Automated AWS infrastructure setup using Terraform, including VPC, ECS Fargate, Amazon RDS, ECR, and CloudWatch.
- Configured a GitHub Actions CI/CD pipeline to build Docker images and push them to Amazon ECR.
- Automated application deployment to Amazon ECS Fargate following code changes pushed to GitHub.
- Configured CloudWatch integration to support application monitoring and operational troubleshooting.

Image Processing with AWS Lambda
Technologies: AWS Lambda, Amazon S3, Amazon SES, Python, OpenCV, Lambda Layers

- Developed an event-driven image-processing workflow using Amazon S3 and AWS Lambda.
- Implemented image manipulation using Python and OpenCV to process image files.
- Integrated S3 events with Lambda to trigger image processing when configured events occur.
- Used AWS Lambda Layers to package image-processing dependencies and support the execution environment.

CERTIFICATIONS

AWS - AWS Cloud Practitioner Certified

Microsoft Azure AI Fundamentals (AI-900)
